

DUTTON POND

Knox Twp., Waldo Co.
U.S.G.S. Morrill, Maine

Fishes

Brown trout
Smallmouth bass
White perch
Chain pickerel
Yellow perch

Minnows
Golden shiner
White sucker
Hornpout (bullhead)
Pumpkinseed sunfish
American eel

Physical Characteristics

Area - 36 acres

Maximum depth - 22 feet

Temperatures:

Surface - 73⁰F
20 feet - 49⁰F

Principal fisheries: Brown trout, smallmouth bass, chain pickerel, white perch

Brown trout were first observed in Dutton Pond during the resurvey of 1966, a result of upstream migration from Sanborn Pond. Brown trout grow well in Dutton Pond, but because spawning and nursery areas are inadequate to maintain a fishery annual stockings are necessary.

Access to the pond is via a dirt road and limited to hand carried watercraft.

Surveyed - August, 1941

Resurveyed - August 1966

Revised - 1998
